Basic Shapes

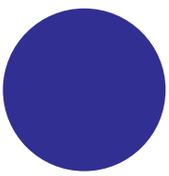

Square

Rectangle

Triangle

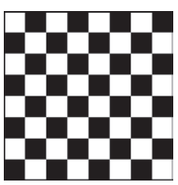

Circle

Let us know the shapes of objects around us. Identify the shapes of the objects and Circle the squares with **Red**, rectangles with **Green**, triangles with **Yellow** and circles with **Blue** colours. Connect the objects of similar shapes.

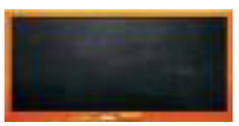

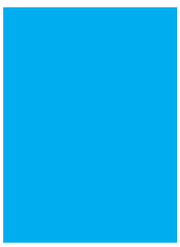

3rd_Unit_01_Geometry_Term 1.indd 1 12/11/2024 3:41:23 PM

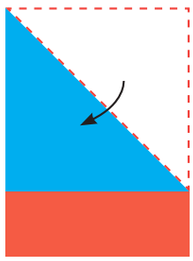

1.1 Construction of 2D shapes

Let us make a square by folding a paper by following the given steps.

Step 1:
Take a paper

Step 2:
Fold the paper as shown in the figure.

Step 3:
Shade the extra portion in the bottom with red colour. Tear it off and keep it aside.

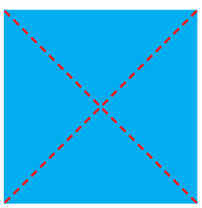

Step 4: Open up the triangle. What do you observe?
You could see a square.
The crease in the middle of the square is called the 'Diagonal of the square'.
You can note that the diagonal divides the square into two triangles.

Try This

Can you find the other diagonal of the square by folding it the other way? If so, how many diagonals can you find for a square?.

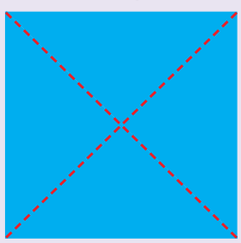

Observe the number of sides and corners of a square.
A square has **four** sides, **four** corners and **two** diagonals.

properties of a square

We shall summarise the properties of a square as follows:

- Square has four sides.
- All the four sides are equal.
- Square has four corners.
- Square has two diagonals.
- The two diagonals are equal.

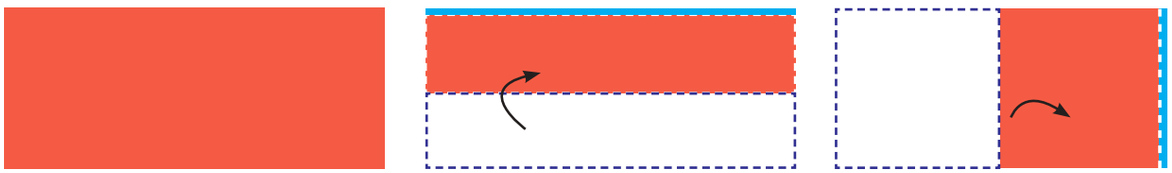

Teacher's note: Guide the children to do this paper folding activity.

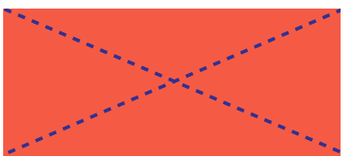

3rd_Unit_01_Geometry_Term 1.indd 2 09-01-2025 11:24:47

Let us make a rectangle by folding a paper

Take the red coloured piece which was kept aside. Observe its sides. Fold the opposite sides of the rectangle.

What do you observe? The sides coincide. Now we get opposite sides equal. Hence in a rectangle, opposite sides are equal.

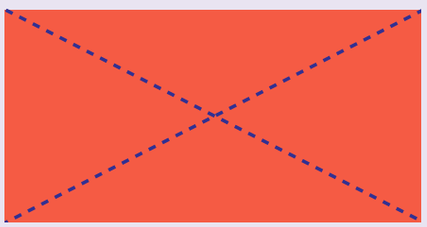

Fold the opposite corners as we did in the square. Observe the crease. It shows the diagonal of the rectangle.

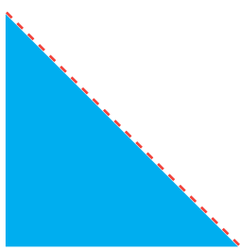

properties of a rectangle

The properties of a rectangle are as follows:

- Rectangle has four sides.
- Two opposite sides are equal.
- Rectangle has four corners.
- Rectangle has two diagonals.
- Two diagonals are equal.

Let us make a triangle by folding a paper

Fold the square along any of these diagonals to form a triangle.

Observe the Sides and corners of the triangle.

A triangle has **three** sides and **three** corners.

Cut the paper and make triangles of different kind.

Observe and discuss about the length of the sides of the triangle.

Let us know

Isosceles triangle

Equilateral triangle

Scalene triangle

Try This How many triangles can be made out of the square paper?

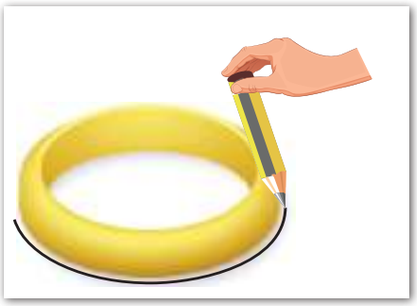

3rd_Unit_01_Geometry_Term 1.indd 3 09-01-2025 11:24:53

Let us draw a circle using pencil and Bangle.

Step 1:
Place a bangle on the paper as shown in figure.

Step 2:
Trace the outline of the bangle with a curved line with the pencil until you reach the starting point, we get a circle.

properties of a circle

On observing the circle drawn, we shall write the properties of it as follows:

- Circle has no sides.
- Circle has no corners.
- Circle has a centre point.

Activity 1

Write the names of few objects in everyday use and mention their geometrical shapes. Example, Paper- Rectangle

Practice

1) Triangle has _____ corners.
2) Four sides of a square are _____.
3) Circle has _____ sides.
4) Rectangle has _____ diagonals.
5) Opposite sides of a rectangle are _____.
6) Circle has _____ centre point.

Teacher's note: Facilitate the children to explore the properties of shapes in various aspects.

3rd_Unit_01_Geometry_Term 1.indd 4 09-01-2025 11:25:48

Complete the following table by filling the properties of 2D shapes.

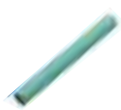

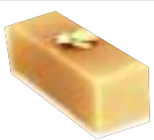

S. No	Figure	Name of the Shape	Number of sides	Number of corners	Number of diagonals
1		Rectangle			
2		Traingle			
3		Circle			
4		Square			

1.2 Properties of 3D Objects

We can see many things around us have straight lines and curved lines.

Activity 2

Tick the appropriate boxes to show the lines found in the given objects.

Objects					
Straight line					
Curved line					

Plane Surface: Plane surface is a flat surface. Surface of objects like walls, floors, papers and top of a table are flat. Cubes and cuboids have flat surfaces.

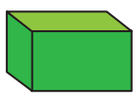

3rd_Unit_01_Geometry_Term 1.indd 5 12/11/2024 3:41:23 PM

Curved Surface: Curved surface is a round surface that is not flat. Surfaces of objects such as ball, flower vase and pot are curved. Cone, cylinder and sphere have curved surfaces.

Practice

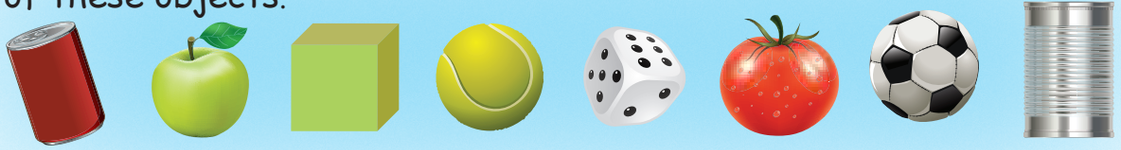

Tick the appropriate columns.

Shapes					
Plane surface					
Curved surface					
Plane surface and Curved surface					

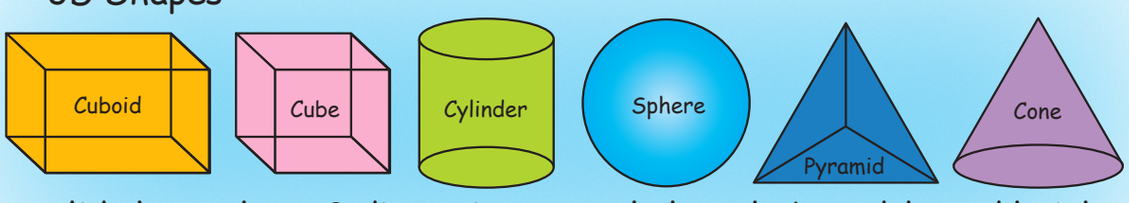

Teacher's note: Discuss about the types of lines found in objects in everyday use and enable the children to draw them in above tabular column.

Look at the things around you.

Identify the shapes of the objects. Observe the dimensions of these objects.

3D Shapes

Solid shapes have 3 dimensions namely length, breadth, and height. These are shortly called as 3D shapes.

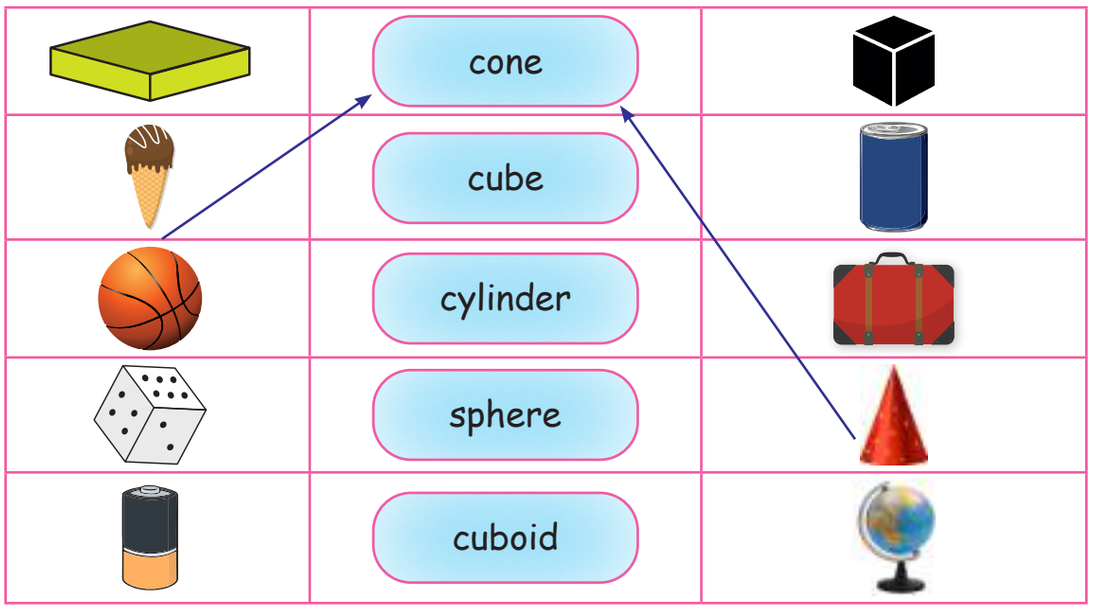

3rd_Unit_01_Geometry_Term 1.indd 6 12/11/2024 3:41:25 PM

Let us know

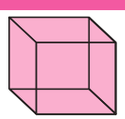

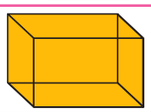

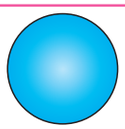

A Cube is a solid shape made of squares. It has 6 faces, 12 edges and 8 vertices.
A Cuboid is a solid shape made of rectangles. It has 6 faces, 12 edges and 8 vertices.
A Sphere is a solid shape of circles. It has 1 face, no edges and no vertex.

Practice

1. Match the following.

2. Complete the following table by filling the properties of 3D shapes.

S. No	Figure	Name of the Shape	Number of faces	Number of edges	Number of corners
1		Cube			
2		Cuboid			
3		Sphere			

Teacher's note: Facilitate the children to draw the front and side views of 3D shapes by providing the objects.

56 ___ 21 = 35	75 ___ 17 = 92

2.1 Numbers sequence upto 1000.

Recall

- Numbers 0, 1, 2, 3, 4, 5, 6, 7, 8 and 9 are one digit numbers.
- Numbers from 10 to 99 are two-digit numbers.

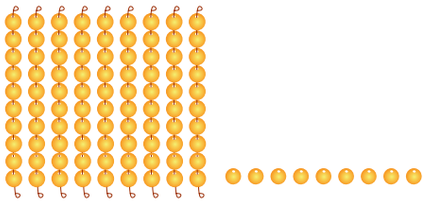

99 is the biggest two-digit number.
10 is the smallest two-digit number.

3rd_Unit_02_Numbers_Term 1.indd 9 12/12/2024 10:57:26 AM

Formation of the numbers such as 10, 100 and 1000.

	Hundred	Tens	Ones
		9	9
+			1
	1	0	0

When we add 1 with 99 we get the numeral 100 which is represented by the number name "HUNDRED", the smallest three digit number.
One hundred has 10 tens.One hundred has 100 ones.

	1	0	0	0

When we add 1 with 999 we get the numeral 1000 which is represented by the number name "Thousand", the smallest four digit number.
One thousand has 10 hundreds. One thousand has 100 tens.

Read and write all three digit numbers and number names.

We shall represent 100 in an abacus as shown below.

	H	T	O
	1	0	0

No beads in the ones place shows 0 Ones.
No beads in the tens place shows 0 Tens.
1 bead in the hundreds place shows 1 Hundred.

The place value of hundreds place is higher than tens place.

Hundred (or) 100 is the smallest three digit number.

Activity 6

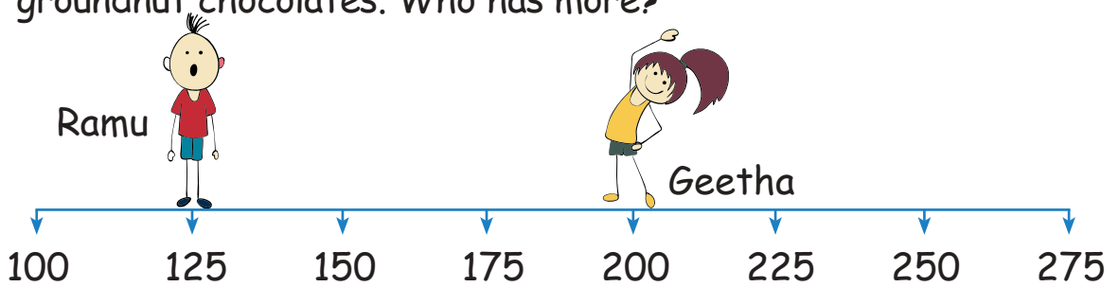

Colour the balloons with odd number by yellow and even number by red.

In number sequence, after every odd number there is an even number. Similarly after every even number there is an odd number.

2.2 Comparison of numbers

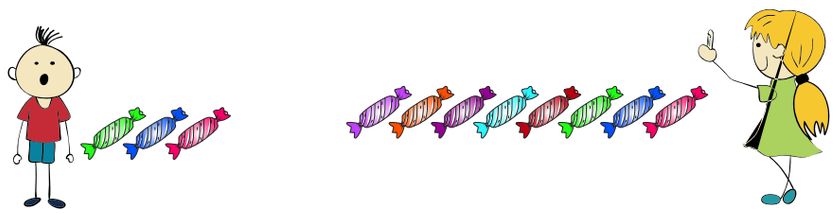

Ramu has 125 groundnut chocolates and Geetha has 200 groundnut chocolates. Who has more?

3rd_Unit_02_Numbers_Term 1.indd 16 12/12/2024 10:57:30 AM

Greater and smaller numbers

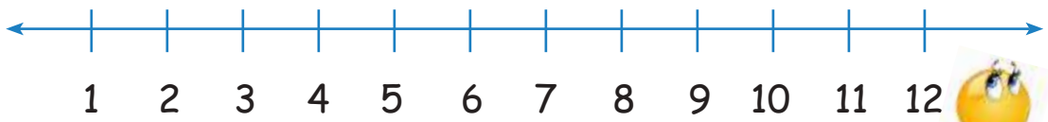

Amuthan has 3 chocolates and his sister Meenakshi has 8 chocolates. Who has more chocolates?

In a number line, any number which comes before a number is smaller than that number.

In a number line, any number which comes afer a number is greater than that number.

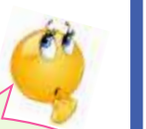

In a number line 3 comes before 8 or 8 comes after 3.

3 is smaller than 8.

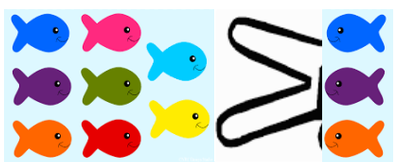

8 is greater than 3.

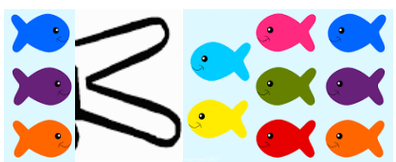

Meenakshi has more chocolates.

Know more
'0' does not have any value at the beginning of a number. Why?

Using symbols

3 is smaller than 8

we write 3 < 8

27 is smaller than 40

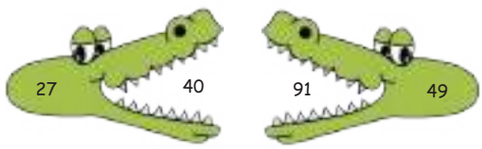

we write 27 < 40

8 is greater than 3

we write 8 > 3

91 is greater than 49

we write 91 > 49

3rd_Unit_02_Numbers_Term 1.indd 17 12/12/2024 10:57:30 AM

1. Comparison of numbers with different number of digits.

The number which has more number of digits is the greater number.

Compare 115 and 89

H	T	O
1	1	5

H	T	O
	8	9

The number 115 has 3 digits and 89 has only 2 digits.
So 115 is greater than 89. We write 115 > 89.

2. Comparison of numbers with equal number of digits.

Step 1: If the number of digits are equal (say 3 digits), compare the digit in the hundreds place. The number which has a greater value in the hundreds place is greater.

Compare 160 and 250

H	T	O
1	6	0

H	T	O
2	5	0

Look at the hundreds place

2 is greater than 1. So, 250 is greater than 160. We write 250 > 160. We can also write 160 < 250.

Step 2: If the digits in the hundreds place are same, compare the digits in the tens place. The number which has the greater digit in the tens place is the greater number.

The digit in the hundred place are the same. Compare the digits in the tens place.

Compare 143 and 151

H	T	O
1	4	3

H	T	O
1	5	1

Look at the tens place

5 is greater than 4. so, 151 is greater than 143. We write 151 > 143. We can also write 143 < 151.

3rd_Unit_02_Numbers_Term 1.indd 18 12/12/2024 10:57:30 AM

Step 3: If the digits in the hundreds and the tens place are same, compare the digits in the ones place. The number which has the greater digit in the ones place is the greater number. The digits in the hundreds place and tens place are the same. Comparing the digits in the ones place.

Compare 141 and 148

H	T	O
1	4	1

H	T	O
1	4	8

Look at the ones place

8 is greater than 1

So the number 148 is greater than 141.

We write 148 > 141

We can also write 141 < 148.

3. Comparing numbers with same value in all the digits

The digits in the hundreds place, tens place and ones place are the same.

H	T	O
5	3	6

H	T	O
5	3	6

So, 536 = 536

Let us know

The greatest three digit number is 999.
The smallest three digit number is 100.

Try this

Put appropriate symbol (<, >, and =) in the boxes provided.

2.3 Ordering

Ascending and Descending order.

111, 112, 113, 114, 115

When we write the numbers from smallest to greatest, we call it **"Ascending order"**.

When we write the numbers from greatest to smallest, we call it **"Descending order"**.

Try this

Write the even numbers between 245 and 255 in descending order.

Example:

Let us arrange the numbers 235, 230, 238 in ascending order and in descending order.

Ascending order

230 < 235 < 238

230, 235, 238

Descending order

238 > 235 > 230

238, 235, 230

Try this

1. Arrange the following numbers in ascending order.

a. 55, 63, 40, 8

b. 217, 201, 215, 219

c. 50, 405, 109, 600

d. 785, 757, 718, 781

2. Arrange the following numbers in descending order.

a. 212, 503, 369, 60

b. 051, 100, 810, 167

c. 323, 303, 332, 33

d. 205, 210, 290, 300

Forming 3 digit numbers using given numbers as digits

Consider the digits 2 and 7.

We shall form the greatest and smallest two digit numbers using these numbers.

The two-digit numbers formed using 2 and 7 are 27,72,22,77.

(77 is the greatest and 22 is the smallest 2 digit numbers)

Similarly, 7, 4 and 8 are given numbers.

We shall form the greatest and smallest three digit number using these numbers (without repetition).

748, 784, 874, 847, 487, 478

Arrange the given numbers from the smallest number to greatest number, we get **ascending order**.

478, 487, 748, 784, 847, 874

Arrange the above from the greatest number to smallest number, we get **descending order**.

874, 847, 784, 748, 487,478

874 is the greatest number and 478 is the smallest number.

Practice

1. **Form the greatest and the smallest numbers using the given digits (without repetition of digits)**

Addition of Three Digit Numbers (Without Regrouping)

Example:

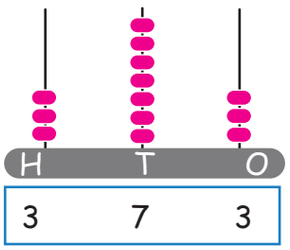

Add 132 and 241

	H	T	O
	1	3	2
+	2	4	1

In abacus, first put 132 as:

then add 241, by putting 1 more in ones, 4 more in tens and 2 more in hundreds.

Addition of numbers is called sum of the numbers.

sum = 373

Example: Add 342 + 515 + 12

step 1: add ones

	H	T	O
	3	4	2
+	5	1	5
		1	2

step 2: add tens

	H	T	O
	3	4	2
+	5	1	5
		1	2
			9

step 3: add hundreds

	H	T	O
	3	4	2
+	5	1	5
		1	**2**
	6	**9**	

	H	T	O
	3	4	2

Addition of Three Digit Numbers (With Regrouping)

Example: Add 556 and 194

Add ones

	H	T	O
		1	
+	5	5	6
	1	9	4
			0

6 + 4 = 10 Ones = 1 Ten

With regrouping.

10 ones = 1 Ten + 0 ones

So, we put 0 in ones place and carry over 1 to ten place.

Add Tens

	H	T	O
		1	
+	5	5	6
	1	9	4
		5	0

1 + 5 + 9 = 15 tens

15 tens = 1 hundred + 5 tens

So, we put 5 in tens place. And carry over 1 to hundred place.

Add hundreds

	H	T	O
	1	1	
+	5	5	6
	1	9	4
	7	5	0

1 + 5 + 1 = 7 hundreds

So, we put 7 in hundreds place.

Sum = 750

Try this

Add the following numbers.

a.
$$\begin{array}{r} 709 \\ +\ 261 \\ \hline \end{array}$$

b.
$$\begin{array}{r} 339 \\ +\ 202 \\ \ \ 28 \\ \hline \end{array}$$

2.5 Estimation

Estimate the sum and difference of the two given numbers by rounding off to nearest Ten.

Let us round off three numbers 17, 24 and 25 to the nearest 10s.

- We can see that 17 is between 10 and 20 but it is more closer to 20 than 10. So, 17 is rounded off to 20.
- 24 is between 20 and 30 but it is more closer to 20 than 30. So, 24 is rounded off to 20.
- 25 is between 20 and 30. But it is exactly on the middle point. So, 25 is rounded off to 30.

We can easily estimate the sum and difference of any 2 numbers by rounding off them to nearest values and adding or subtracting them.

Example:

1. Estimate the sum by rounding off to the nearest value and find the actual sum.

Problems	Estimated Answer	Actual Answer
24	20	24

PATTERNS

Observe the pictures given below.

Patterns

Patterns are formed when objects, events and numbers are repeated uniformly in a specific way.

3.1 Patterns in shapes

Creating patterns of regular and irregular shapes by stamping.

Example: **block patterns created using handprints and foot prints are shown below.**

(ii) Fingers, hands, toes, feet.
(iii) Using bangles.

Activity 2

Create patterns on your own by impressing the following on a chart paper and decorate your class room.

i. seeds ii. buttons iii. bottle lids

My own patterns

Pattern in geometrical shapes

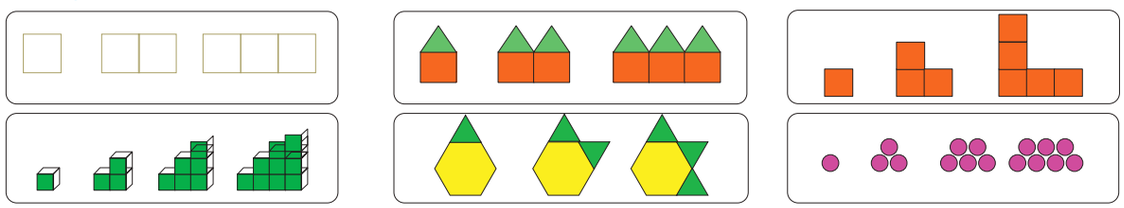

There are two types of patterns. They are

☺ Growing patterns. ☺ Repeated patterns.

Growing Patterns

If some patterns and designs increase or grow with straight lines and geometrical forms, they are called growing patterns.

Example:

Try this

Create some growing patterns using circle and square.

3.2 Symmetry

Symmetries in shapes and patterns.

Do yourself

1. Take a piece of paper.
2. Spill few drops of ink on the paper.
3. Now fold the paper and press it.
4. You will get a symmetric figure.

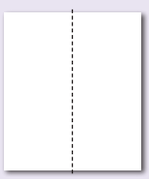

Definition

When a shape or an object is folded into two parts, the two parts coincide exactly then it is called symmetry.

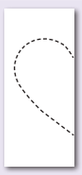

Note: When a mirror is placed on the line of fold then the image will completely match with the other part.

Let us do

1. Take a sheet of paper and fold it.

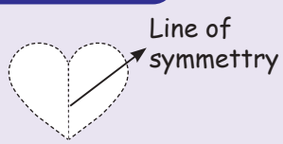

2. Draw any shape at the folded edge of the sheet.

3. Cut the shape

4. Unfold it

Example:

3rd_Unit_03_Patterns_Term 1.indd 40 12/11/2024 3:41:57 PM

Line of symmetry

The line which divides the figure into two exact halves is called ***the line of symmetry***.

The following letters are non symmetric and do not have line of symmetry.

F G J L N P Q R S Z

Try this

Make the paper cut outs of the shapes shown below with the help of your elders and keep them infront of a mirror and observe the image formed in the mirror. You could see the other half of the image.

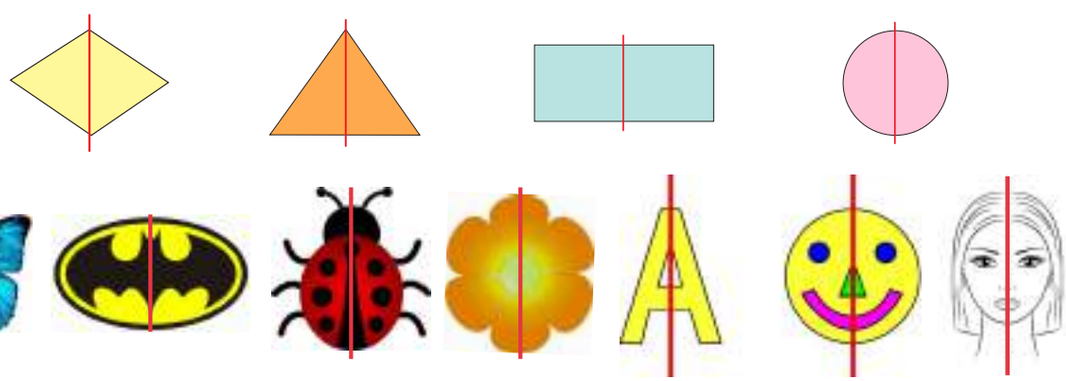

Symmetrical shapes

Definition

If a shape can be folded or divided into half so that the two halves match exactly then the shape is called a symmetrical shape.

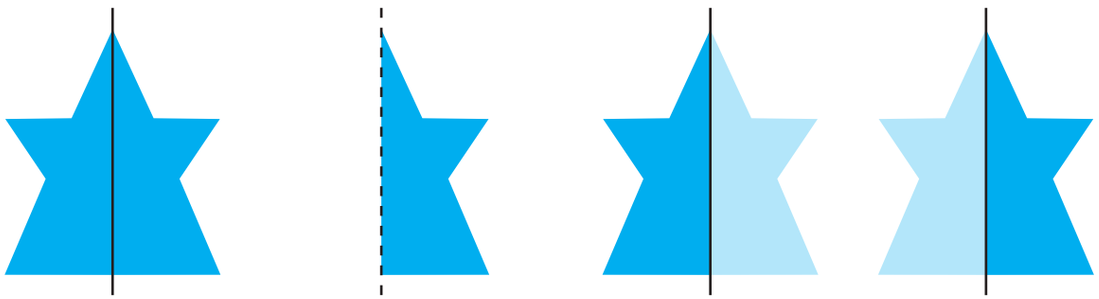

Example: 1

  - 4. Kilometre

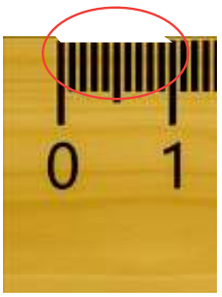

4.2 Millimetre and Centimetre.

Introduction

This is a centimetre scale/ruler. 0 is the starting point. The numbers 1, 2, 3... mentioned below the lines represent the measure of centimetre, that is 1 denotes 1 centimetre 2 denotes 2 centimetre and so on. It is denoted by cm.

Each centimetre is divided into 10 equal parts by the smaller lines. Each of these parts represent 1 millimetre. It is denoted by mm.

From the picture,

1 centimetre equal to 10 parts.

10 parts = 10 milimetre

So 10 millimetre = 1 centimetre.

Short form

Millimetre	-	mm
Centimetre	-	cm
Metre	-	m
Kilometre	-	km

How many millimetres are there between 0 and 1?
How many millimetres are there between 1 and 2?
How many millimetres are there in 1 centimetre?

Teacher's note: Help the children to find length of the objects by using standard units.

3rd_Unit_04_Measurement_Term 1.indd 46 12/11/2024 3:51:58 PM

Let us know

100 centimetre = 1 metre
1000 metre = 1 Kilometre

Millimetre is the smallest unit of length.
Kilometre is the biggest unit of length.

Example:

millimetre (mm) centimetre (cm) metre (m)

1 Week	= 7 Days
1 Month	= 30 Days
1 Year	= 12 Months
1 Year	= 365 Days
1 Leap year	= 366 Days

Leap year

A leap year has 366 days. There are 29 days in February in a leap year. It occurs once in every 4 years. The year 2016 was a leap year. 2020 is a leap year. 2024 will be the next leap year.

2 Information Processing

6.1 Systematic Listing

Listing all possible choices

Kavin has taken 2 trousers and 3 shirts with him to wear in a picnic. List down all the possible choices that he can wear them.

Example:

picture 1

picture 2

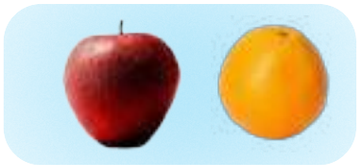

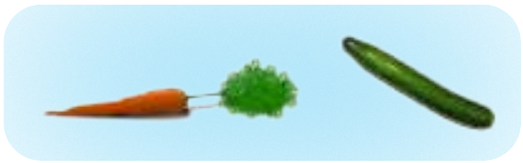

picture 3

There are two possible ways of dressing using one half sleved shirt and two trousers as shown in picture 1. Similarly we shall pair remaining two full sleved shirts with the trouser in four ways as shown in picture 2 and picture 3. Hence there are six possible ways of pairing two trousers with three shirts.

Activity 3

1. List down all possible meaningful 3 letter and 4 letter words starting with the alphabet 'A'.
2. List the names of the animals with 4 letters.

6.2 Collection and Representation of Data

Pictorial Representation

Symbols and pictures can be used to represent data. This is known as **Pictorial Representation.** This helps us to study and understand data easily.

Example: Look at the below picture and fill the required data.

i. How many  are there? **3**

ii. How many  are there? **3**

iii. Circle the animal which is more in count.

iv. Circle the animal which is less in count.

v. What is the difference between highest and lowest count? **3**

vi. Total number of animals in the zoo train is **17**.

3rd_Unit_06_Information_Term 1.indd 59 09-01-2025 12:06:09

Example:

The following picture represents the data on fruits sold in a shop.

Apple	
Orange	
Banana	
Pineapple	

Look at the above picture and fill the required data.

i. Name the fruit which was sold more.

ii. Name the fruit which was sold less.

iii. Find the number of apples sold.

iv. Write the number of bananas sold.

v. What is the difference in the number of pineapples and oranges sold ?

Practice

1. Collect the data from 40 of your friends about their favourite food and represent it in Picture.

6.3 Drawing Conclusion from the Represented Data

The graph below shows the number of children in a school studying in classes 1-4 of a school. The number of girls studying in classes 1-4 of a school are 14, 10, 16 and 13 respectively. Draw the graph discussing with your teacher for number of boys studying in classes 1-4.

Class		Number of students	Total
I standard	Girls		14
	Boys		
II standard	Girls		10
	Boys		
III standard	Girls		16
	Boys		
IV standard	Girls		13
	Boys		

After completing the pictorial representation answer the following questions.

i. The number of girls in class 2 is _____.

ii. The number of boys in class 3 is _____.

iii. The total number of students in class 4 is _____.

iv. The total number of girls from class 1 to 4 is _____

v. The total number of boys from class 1 to 4 is _____.

vi. The class which has more strength is _____.

WDOJI

Teacher's note: Help the children to collect the number of boys in each class and complete the pictorial representation.
